***Allowable Subject Matter***

The following is an examiner's statement of reasons for allowance: the closest prior art of record teaches the extraction of heavy metals by mercaptans attached to silica gel by a corkscrew mechanism (Bowe et al, 8/13/02, cite. # 2 on IDS dated 4/19/04). The closest prior art of record, however, fails to teach or fairly suggest extraction of metals by mercaptans attached to silica by azeotropic distillation, nor the method of azeotropic attachment of mercaptans to silica gel, as claimed herein.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
